

IMPORTANT NOTE: Each week we produce a chart book of 10 stocks which have hit our watch list for potential additions to our long-short equity trading portfolio. With the recent sharp advance in the market, we it has become a difficult task to find potential candidates this week. **This is indicative of an overextended bull run that is due for a correction.**

As noted last week, the new [SCAN TOOL](#) also has several new screening parameters to include both fundamental factors (*Piotroski Score*) and momentum factors (*Mohanram Score*) along with Zack's rankings.

HOW TO READ THE CHARTS

There are four primary components to each chart:

- The price chart is contained within the shaded area which represents 2-standard deviations above and below the short-term moving average.
- The Over Bought/Over Sold indicator is in orange at the top.
- The Support/Resistance line (green) is the longer-term moving average which also acts as a trailing stop in many cases.
- The Buy / Sell is triggered when the green line is above the red line (Buy) or vice-versa (Sell).

LONG CANDIDATES

CRM - Salesforce

- Last week we recommended CRM as a potential long.
- With the 50-dma crossing above the 200-dma, a breakout to new highs, and a triggered "buy" signal, the bullish trend for CRM remains.
- We said that with CRM being very overbought to look for a pullback to support to add exposure.
- We recommended buying 1/2 position and add on a pullback to \$150-155.
- That target was reached this week.
- Stop remains at \$145
