

HOW TO READ THE CHARTS

There are four primary components to each chart:

- The price chart is contained within the shaded area which represents 2-standard deviations above and below the short-term moving average.
- The Over Bought/Over Sold indicator is in orange at the top.
- The Support/Resistance line (green) is the longer-term moving average which also acts as a trailing stop in many cases.
- The Buy / Sell is triggered when the green line is above the red line (Buy) or vice-versa (Sell).
